

Youngmin Jeong

jym8253@seoultech.ac.kr ◇  github ◇  Homepage

Research Interests

Computer Vision, Robot Vision, Visual Perception, Multi-modal Learning, Vision-Language Models

Education

Seoul National University of Science and Technology (SeoulTech)

Seoul, Korea

B.S. in Applied Artificial Intelligence, GPA: 3.9/4.5, Expected Graduation: Mar. 2027

Mar. 2021 – Present

Research Experience

Intelligent Pattern Analysis and Learning (IPAL) Lab

Seoul, Korea

Undergraduate Research Assistant, Advisor: Prof. Beom-Seok Oh

Oct. 2024 – Aug. 2026

Artificial Intelligence for Remote Sensing (AIR) Lab

Seoul, Korea

Undergraduate Research Assistant, Advisor: Prof. Seonyoung Park

Apr. 2021 – Feb. 2023

Publications

⟨ **International Journal** ⟩ (*Equal contribution is denoted by “*”.*)

[1] Yerang Lee*, **Youngmin Jeong***, Beom-Seok Oh, Seonyoung Park, and Eun Gyung Chung, “A Deep Semantic Segmentation System for Detecting Multi-Scale Barns of Diverse Livestock Breeds in Satellite Imagery,” *IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing (J-STARS)*, under review, 2026.

⟨ **Domestic Conferences** ⟩

[1] **Youngmin Jeong** and Beom-Seok Oh, “GLCFormer: Improving Livestock Facility Detection in Satellite Imagery Using Graph-Based Land-Cover Information Fusion,” *Summer Annual Conference of the Institute of Electronics and Information Engineers (IEIE)*, 2026.

[2] Yerang Lee*, **Youngmin Jeong***, and Beom-Seok Oh, “HeteroBarnMapper: A Detection-to-Mapping System for Heterogeneous Livestock Facilities with Reliable Evaluation,” *Summer Annual Conference of the Institute of Electronics and Information Engineers (IEIE)*, 2025. (*Oral Presentation*)

[3] **Youngmin Jeong***, Yerang Lee*, and Beom-Seok Oh, “DualLCFormer: Livestock Facility Detection using a Dual Encoder Architecture with Land Cover Fusion,” *Summer Annual Conference of the Institute of Electronics and Information Engineers (IEIE)*, 2025.

[4] **Youngmin Jeong**, Kyungil Lee, and Seonyoung Park, “Landsat 9 based Local Climate Zone Mapping using CNN in Rome,” *Fall Annual Conference of the Korean Association of Geographic Information Studies (KAGIS)*, 2022.

Research Projects

Dataset Construction and Management for Training Satellite Imagery Foundation Models *Mar. 2026 – Present*

Korean Society for Aeronautical and Space Sciences (KSAS)

- **Role:** Foundation model implementation and evaluation using curated multi-source satellite imagery datasets.

Development of Monitoring Methods for Livestock Facility Detection *Nov. 2024 – Nov. 2025*

National Institute of Environmental Research (NIER)

- **Role:** Led model development and extensive experimentation for an end-to-end livestock facility detection pipeline, including post-processing, object-level evaluation, and field validation.

Selected Projects

RS-AutoLabel: Training-Free Open-Vocabulary Remote Sensing Auto-Labeling *Sep. 2025 – Jun. 2026*

Capstone Design Project, SeoulTech

- Developed an open-vocabulary remote sensing auto-labeling system with region consistency refinement and user-assisted exemplar prompting.

Open-Vocabulary VLM-Based Interactive Object Labeling Automation System *Sep. 2025 – Nov. 2025*

2025 Space Hackathon, Korea Aerospace Research Institute (KARI)

- Developed an interactive object labeling automation system using open-vocabulary vision-language models.

Awards & Honors

Special Award (3rd Place), 2026 Capstone Design Demo Day, SeoulTech

Jun. 2026

Top Excellence Award (2nd Place), 2025 Space Hackathon, KARI

Nov. 2025

AIS Scholarship (Full Tuition), SeoulTech

Mar. 2021 – Present
